Professional Summary

Guidewire-focused Java Developer with 3+ years of software engineering experience in enterprise application development, REST/SOAP APIs, microservices, SQL, integrations, production support, and Agile delivery. Skilled in Guidewire InsuranceSuite concepts including PolicyCenter, ClaimCenter, BillingCenter, ContactManager, Guidewire Studio, Gosu, PCF configuration, entity configuration, typelists, business rules, workflows, plugins, messaging, batch processes, and external system integrations. Strong understanding of Property and Casualty insurance workflows including quote, bind, issue, endorsement, renewal, cancellation, FNOL, claims, billing, payments, coverages, deductibles, and underwriting rules.

Technical Skills

Guidewire: InsuranceSuite, PolicyCenter, ClaimCenter, BillingCenter, ContactManager, Guidewire Studio, Gosu, PCF Configuration, Entity Configuration, Typelists, Business Rules, Workflows, Product Model, Rating Basics

Guidewire Integration: REST APIs, SOAP Web Services, Plugins, Messaging, Batch Processes, XML, JSON, Data Mapping, External System Integration, Guidewire Cloud/API Concepts

Programming: Java, Gosu, J2EE, Spring Boot, Microservices, Kafka, OOP, SQL, JavaScript

Insurance Domain: Property and Casualty Insurance, Policy Lifecycle, Claims Lifecycle, Billing Lifecycle, Quote-Bind-Issue, Endorsement, Renewal, Cancellation, FNOL, Coverage, Exposure, Deductible

Databases and DevOps: PostgreSQL, MySQL, MongoDB, AWS, Microsoft Azure, Docker, Git, GitHub, CI/CD, Jenkins, GitHub Actions

Tools and Practices: Agile/Scrum, Requirement Analysis, Unit Testing, Debugging, Production Support, Code Review, Performance Optimization, Observability

Professional Experience

Senior Software Engineer

Dec 2024 - Present

Wipro, Gurugram, Haryana, India

- Work on enterprise application development with a Guidewire-aligned focus on PolicyCenter, ClaimCenter, BillingCenter, REST/SOAP integrations, Java services, and microservice-based insurance workflows.
- Analyze policy, claims, billing, contact, account, document, and payment data flows to support InsuranceSuite integration requirements and downstream system communication.
- Apply Guidewire configuration concepts such as PCF screen behavior, entity extensions, typelists, validation rules, business rules, workflow logic, and Gosu-based enhancements for insurance use cases.
- Design API contracts and integration mappings using XML/JSON, REST services, SOAP services, plugins, messaging, and batch processing patterns for external insurance systems.
- Support production troubleshooting by reviewing logs, database queries, service metrics, API failures, integration errors, and data mismatch issues across application layers.
- Collaborate with business analysts, QA teams, and Agile engineering teams to convert insurance business requirements into technical deliverables, test scenarios, and release-ready solutions.

Software Engineer

Jul 2023 - Dec 2024

Vivriti Capital, Chennai, Tamil Nadu, India

- Built and maintained Java/Spring Boot services and REST APIs for financial workflows, with transferable experience relevant to Guidewire integration, billing, payments, account management, and transaction processing.
- Developed scalable backend services for high-volume transaction workflows using Java, SQL, MongoDB, REST APIs, and asynchronous processing patterns similar to Guidewire messaging and batch jobs.
- Implemented validation, error handling, audit logging, retry logic, reconciliation support, and exception management to improve reliability of data exchange between internal and external systems.
- Designed Kafka-based event processing pipelines for asynchronous communication, downstream notifications, and transaction status updates across business-critical systems.
- Worked with product and QA teams to understand business requirements, prepare technical changes, support testing, debug defects, and deliver stable releases for enterprise users.

Java Developer Intern

Dec 2022 - Jul 2023

Vivriti Asset Management, Chennai, Tamil Nadu, India

- Developed Java-based backend components, SQL queries, reporting logic, and REST API endpoints for business process automation and internal system integrations.
- Gained hands-on experience in requirement analysis, service-layer development, database interaction, debugging, unit testing, deployment support, and release activities.
- Worked on maintainable software components with focus on object-oriented design, clean code, API connectivity, error handling, and documentation for team collaboration.

Projects

Guidewire InsuranceSuite Learning Project Guidewire, Gosu, Java, REST/SOAP, SQL, XML, JSON

- Designed a sample Property and Casualty insurance workflow covering quote, bind, issue, policy change, renewal, cancellation, FNOL, claim creation, billing, and payment reconciliation.
- Prepared Guidewire-style configuration notes for entity extensions, typelists, PCF screens, validation rules, business rules, workflow routing, and Gosu logic.
- Built Java/Spring Boot mock APIs for external systems such as CRM, document management, payment gateway, and notification services to simulate Guidewire integration scenarios.
- Documented integration flow, request/response mapping, batch processing approach, error handling, retry strategy, and testing scenarios for insurance operations.

Education

Bachelor of Technology in Computer Science

Sathyabama University, Chennai, Tamil Nadu, India

2019 - 2023

Certifications

- Microsoft Azure Fundamentals (AZ-900)
- Python for Data Science
- Guidewire InsuranceSuite Upskilling - PolicyCenter, ClaimCenter, BillingCenter, Gosu, Configuration, and Integration Concepts
